

Portable Water Transfer Pump

This compact water pump is designed for drainage and irrigation. It features a durable housing, efficient motor, and user-friendly controls.

Overview

Professional Portable Water Transfer Solution

This portable water transfer pump is engineered for high-efficiency performance in both agricultural and domestic settings. Its compact design ensures easy mobility, while the durable housing protects the motor for long-term reliability. Featuring user-friendly controls, it simplifies irrigation and drainage tasks for professional and casual users alike.

Technical Specifications

Key Features

- Durable, rugged exterior housing
- High-efficiency motor performance
- Simplified, intuitive control panel
- Compact and lightweight for portability

Suitable Applications	Agricultural Irrigation, Domestic Drainage, Water Transfer
Portable Design	Yes
