

Portable Water Transfer Pump

This portable water pump is designed for irrigation, drainage, and general water transfer. It features a robust engine for reliable performance and a durable frame for protection and easy transport.

Overview

Versatile Portable Water Transfer Pump

The WX-WP20 is a high-performance portable water transfer pump engineered for versatility in demanding environments. Designed to handle both clean and slightly dirty water, it is an essential tool for agricultural irrigation, construction site drainage, and domestic water management. Its robust engine and durable protective frame ensure reliable performance and ease of transport in the field.

Technical Specifications

Supported Water Types

Clean Water • Slightly Dirty Water

Model	WX-WP20
Application Areas	Agriculture, Construction, Drainage, Irrigation, Domestic

Key Features

Features

- Robust engine for high reliability
- Durable frame for heavy-duty protection
- Portable design for easy transport
- High-efficiency water flow technology
