

# Portable Welder Generator

This portable welder generator is designed for both welding and power generation. It features a robust engine coupled with a welding unit and an AC power outlet for diverse on-site applications.

## Overview

### Versatile Power and Welding Solution

The DH190D is a robust portable welder generator engineered for demanding on-site applications. Combining high-performance welding capabilities with reliable AC power generation, this dual-purpose unit is an essential tool for construction sites, maintenance operations, and emergency power backup. Its durable protective frame ensures longevity and ease of transport in rugged environments.

## Key Metrics

### Welding Current

**190 A**

Max Current

### Model Identifier

DH190D

## Technical Specifications

### Core Features

- Integrated welding and power generation
- Protective frame for durability
- Portable design for on-site mobility
- AC power outlet included

### Suitable Applications

Construction, Maintenance, Emergency Power
