

Portable Welding Machine

This is a compact and portable welding machine designed for light-duty applications. It features adjustable current control for optimal welding performance.

Overview

Compact Welding Solution

This portable welding machine is engineered for light-duty applications, offering a perfect balance of performance and mobility. Designed for maintenance, repair, and DIY projects, its lightweight construction ensures easy transport for on-site welding tasks. With adjustable current control, users can achieve optimal welding results across various materials.

Technical Specifications

Performance Features

- Adjustable current control
- Compact and portable design
- Durable construction

Portability Metrics

100 MINI
Model Series

Primary Applications

Maintenance, Repair, DIY Projects, Light-duty Welding
