

Portable Welding Machine

This is a compact and portable welding machine suitable for various welding applications. It is equipped with an adjustable current control knob for precise welding settings and features a durable casing.

Overview

Professional Performance in a Portable Form

The TOTE 160T is a compact and highly portable welding machine engineered for versatility across a wide range of welding applications. It features precise current control for tailored weld settings and a robust, durable casing designed to withstand the rigors of frequent transport. This unit is perfectly suited for professional technicians and demanding projects that require mobility without sacrificing operational consistency.

Technical Specifications

Rated Welding Current

160 A

Welding Current

Control Features

- Adjustable current control knob
- Dedicated power on/off switch
- Standardized welding cable connection points

Design and Utility

Model Designation

TOTE-160T

Build Quality

Portable, Compact Design, Impact Resistant Casing
