

Portable Welding Machine

This compact and portable welding machine is designed for various welding applications. It features adjustable current control, thermal overload protection, and compatibility with different electrode types.

Overview

Compact Performance

This portable welding machine is engineered for versatility and reliability across a wide range of welding tasks. It features precise current control and thermal overload protection to ensure safety and consistent weld quality. Designed for efficiency, this unit provides a stable arc and is compatible with various electrode types, making it an excellent choice for both professional environments and specialized project needs.

Technical Specifications

Performance Ratings

250 A

Max Welding Current

Model Identifier	MMA-250
Key Features	Portable, Thermal Overload Protection, Adjustable Current, Stable Arc
Electrode Compatibility	Multiple electrode types supported
