

Portable Welding Machine with Adjustable Current

This welding machine features a voltage selector for 380V and 220V operation. The machine has a current adjustment knob with settings ranging from 60A to 200A and is equipped with wheels for portability.

Product Overview

Professional Portable Welding Solution

This portable welding machine offers versatile performance with dual-voltage compatibility, supporting both 220V and 380V operations. Designed for mobility, the unit includes integrated wheels and a precise crank mechanism for easy current adjustment. It provides a robust output range from 60A to 200A, making it suitable for a variety of professional welding tasks.

Technical Specifications

Welding Current Range

60 A

Minimum Current

200 A

Maximum Current

Input Voltage Compatibility

220V, 380V

Model Identifier

BXI-200

Design & Portability

Mobility Features

- Integrated transport wheels
- Crank-based adjustment mechanism
