

Portable WiFi Router and SD/USB Adapter

The portable WiFi SD/USB device allows users to convert SD memory cards and USB external storage devices into WiFi storage. It provides a convenient solution for creating a local network and accessing files while traveling.

Product Overview

Universal Media Hub

This portable WiFi router and storage adapter enables seamless wireless access to your files from SD cards and USB external drives. Designed for maximum portability, it allows users to stream photos, music, and videos directly to mobile devices and notebooks. The built-in rechargeable battery ensures flexibility for users on the move, while maintaining functionality even while charging.
