

Positive Displacement Gas Meter

This positive displacement gas meter accurately measures gas flow. It features a mechanical counter display and robust construction suitable for various gas types.

Overview

Precision Gas Measurement

This positive displacement gas meter is engineered for high-accuracy flow measurement across diverse industrial and commercial applications. Featuring a robust construction and a clear mechanical counter display, it is built to perform reliably under varying pressure and temperature conditions. The unit complies with essential industry standards for safety and measurement precision, making it a dependable choice for accurate gas consumption monitoring.

Technical Specifications

Accuracy Class

Class B

Performance Metrics

12000000 m3
Max Capacity

110 kPa
Pressure Rating

Display Mechanism	Mechanical Counter
Operational Condition	Normal

Compliance & Standards

Compliance Tags	Industry Standard Compliant, Safety Rated
