

Poultry Hair Removal Machine

This machine efficiently removes hair from poultry, including chicken, duck, and goose. It utilizes a rotating drum with rubber fingers and a water rinsing system for effective and clean operation.

Product Overview

Efficient Poultry Processing

The JS-50 Poultry Hair Removal Machine is designed for the efficient and effective removal of feathers from chicken, duck, and goose. Constructed for durability, this unit features a rotating drum system that streamlines the processing workflow for small to medium-sized operations. It offers a cost-effective, labor-saving solution that helps maintain high hygiene standards during poultry preparation.

Technical Specifications

Model	JS-50
Power Output	1.1 kW
Motor Speed	1400 rpm
Voltage	220V 50Hz

Physical Dimensions

Net Weight	50 kg
Dimensions (L x W x H)	580 x 580 x 950 mm

Application

Compatible Poultry	Chicken, Duck, Goose
