Overview

Advanced Poultry Watering Solution

This automatic nipple drinker system is engineered to provide a hygienic and efficient watering environment for poultry. Featuring 360-degree trigger technology, it ensures easy access for young chicks while maintaining a dry house through leak-proof design. The system is constructed with durable, anti-corrosive materials for long-lasting performance and easy maintenance.

Technical Specifications

Trigger Mechanism	360-degree activation
Construction Materials	High-grade Plastic, Hot Galvanized Metal
Anti-Corrosion	Yes

System Components

Included Components

- Medicator
- Nipple Drinkers
- Water Cups
- Piping System
- Water Pressure Adjuster
- Drainage System

System Features

Operational Benefits

Leak-proof • Disease Prevention • Easy Maintenance • Lightweight • Water Saving

Feeding System (Bonus)

Feeding System Specifications

Feature	Specification
Grid Capacity	16 Grids
Edge Design	Smooth (Anti-injury)
Mounting Style	Hang style
