

Powder Control Valve with Brass Body

This powder valve controls the flow of dry powder in industrial applications. Its robust brass body includes threaded connections and a red lever handle for manual operation.

Overview

Industrial Powder Control Solution

This powder control valve is engineered for the reliable regulation of dry powder flow in demanding industrial environments. Constructed with a durable brass body, it ensures long-lasting performance and secure, leak-proof integration into existing systems. The inclusion of a manual red lever handle and a safety locking pin makes it an ideal choice for fire suppression systems, chemical processing, and general powder handling applications.

Construction & Design

Body Material	Brass
Operation Method	Manual Lever
Safety Features	Safety Locking Pin, Leak-proof Design

Applications

Suitable Applications

- Fire suppression systems
- Chemical processing
- Dry powder handling

Installation

Connection Type	Threaded
