Overview

Professional Powder Feed Processing Line

This comprehensive production line is engineered for the efficient and consistent manufacturing of high-quality powder feed. The system integrates robust crushing and mixing stages to ensure uniform particle size and homogenous blending of ingredients. Designed for versatility, it is suitable for a wide range of applications including poultry feed, aquatic feed, premixes, and chemical additives.

Technical Specifications

Mixer Design Features

- Two open doors structure
- Rapid discharge capability
- Leak-proof design
- No residue accumulation
- Multifunction liquid adding system
- Optional compressed air jetting system

Raw Material Size Handling

Reduces material thickness >5 mm to <3 mm

Applications

Suitable Industries

Poultry Feed, Aquatic Feed, Premix Production, Chemical Industry, Medicine Industry, Additives
