

Power Back System for Low Capacity Systems

This power back system is most suitable for small capacity systems. It is designed for systems with a capacity of not more than 5kW.

Overview

Compact Power Backup Solution

This power backup system is specifically engineered for small-scale applications, supporting systems with a capacity of up to 5kW. Designed for ease of integration, it features a standard configuration that simplifies setup and operation. With built-in fault contact monitoring, it allows for seamless external status tracking, ensuring reliable performance for your industrial machinery.

Technical Specifications

Maximum System Capacity

5 kW

Max Capacity

Application Compatibility

Low Capacity Systems, Small-scale Industrial, Machinery Components

Operational Features

Monitoring & Control

- Fault contact monitoring
- External monitor integration
- Standardized configuration
