

Power Generating Set

This generating set is engineered for dependable power generation. It features a robust engine and high-efficiency alternator to provide consistent power.

Product Overview

Reliable Power Solutions

The DN series generating set is a high-performance solution designed for stable and consistent power generation across industrial, commercial, and emergency applications. It features a robust engine coupled with a high-efficiency alternator to ensure reliable output under various conditions. Equipped with advanced control systems for comprehensive monitoring and protection, this series offers a range of power outputs to meet diverse energy requirements safely and efficiently.

Performance Metrics

Key Performance Metrics

1 Type

High-Efficiency Alternator

1 Unit

Advanced Control System

Technical Configuration

Core Components

- Robust internal combustion engine
- High-efficiency alternator
- Integrated control and protection system
- Stable power output architecture

Application Areas

Suitable Applications

Industrial, Commercial, Emergency Power, Power Generation

Operational Safety

Safety & Monitoring

Advanced Monitoring • Overload Protection • Safe Operation • System Protection
