

Power Generation Generator

This generator is designed for reliable power generation in various applications. It features a heavy-duty engine and high-efficiency alternator, ensuring stable and consistent performance.

Product Overview

Industrial Power Solution

This robust power generation unit is designed for reliable, consistent performance in demanding environments. Featuring a heavy-duty engine architecture and high-efficiency alternator, it is engineered for stability and ease of operation. With a design focused on low maintenance requirements, this generator provides a dependable power supply for diverse professional applications.

Certifications & Standards

Certifications

CE, ISO 9001:2008, UL

Technical Specifications

Engine Series Compatibility

- G128/135
- C(121)
- D(114)
- P11C
- 105

Key Features

Cooling System • Control Panel Integrated • Protective Enclosure • Low Maintenance

Application Areas

Typical Applications

Heavy-duty vehicles, Passenger cars, Engineering machinery, Marine/Ships, Mobile power stations
