Product Overview

Comprehensive Piston Repair Solution

This high-performance piston repair kit is engineered for K19, K38, and K50 series power generators. Designed for demanding environments such as opencast mining rigs, the kit includes all essential components for a complete piston assembly replacement, including pistons, rings, wrist pins, and retaining clips. These components are crafted from durable metal alloys to ensure longevity and reliable performance under high-stress conditions.

Compatibility & Parts

Included Part Numbers

- 3631241
- 3631242
- 3631245
- 3631246

Compatible Engine Series

K19, K38, K50

Kit Contents

Kit Components

Piston • Piston Rings • Wrist Pin • Retaining Clips

Application

Primary Applications

Heavy-duty power generation and opencast mining equipment
