

Power Strip for Machinery and Compressors

This power strip is designed for general machinery and compressor applications. It features multiple outlets, a power switch, and a durable cord for reliable power distribution.

Overview

Industrial Power Distribution

The KF-U-3K power strip is engineered specifically for demanding environments such as machinery and compressor operations. It provides a reliable and safe solution for distributing power to multiple devices from a single source. Designed with durability in mind, this unit features a robust power switch and a heavy-duty cord to ensure consistent performance in professional settings.
