

# Power Tiller Tractor

This robust machine-tool is designed for various agricultural and landscaping applications. It features a powerful engine, heavy-duty tires for optimal traction, and a durable frame built to withstand demanding tasks.

## Product Overview

### Professional Soil Preparation Power Tiller

This robust power tiller is designed for high-efficiency agricultural and landscaping tasks. Featuring a water-cooled, four-stroke engine, it provides reliable performance for plowing, harrowing, and tilling operations. Its durable frame and heavy-duty construction make it a dependable choice for demanding soil preparation requirements.

## Technical Specifications

Engine Configuration	Single Cylinder, Horizontal, Water Cooled, Four Stroke, Preheated Type
Constructional Weight	90 kg

## Performance Metrics

### Operational Efficiency

**500.15 m<sup>2</sup>/h**  
Ploughing Capacity

**833.75 m<sup>2</sup>/h**  
Harrowing Capacity

**1000.5 m<sup>2</sup>/h**  
Tilling Capacity

## Application Suitability

Primary Applications	Ploughing, Harrowing, Tilling, Soil Preparation
