Overview

Versatile Tilling Performance

This power tiller is engineered for efficient soil preparation and cultivation in gardens, small farms, and muddy land environments. Featuring a compact and durable structure with an aluminum gear box and belt drive, it offers a mature, reliable design for long-term use. The machine is highly adaptable, supporting different blade configurations for both dry land farming and paddy field operations.

Technical Specifications

Engine Power

7 HP

Horsepower

212 cc

Displacement

Construction Details

- Aluminum gear box
- Belt drive system
- Handle bar with cover plate
- Curved mud fender design
- Specialized starter for impurity protection

Operational Capabilities

Key Benefits

Easy to operate • Flexible • Adaptable • Mud-resistant

Applications

Dry land farming, Paddy field operations, Soil aeration, Seedbed preparation
