

Power Tool Accessories Set

This power tool accessories set is designed for grinding, polishing, and surface preparation tasks. It includes a variety of materials and grits suitable for different applications, from aggressive material removal to fine finishing.

Overview

Versatile Surface Preparation Solution

This comprehensive power tool accessories set is engineered to handle a wide range of surface preparation tasks, including grinding and polishing. Designed for professional use, the kit features a variety of specialized components such as flap discs, polishing wheels, and mounted brushes. Its diverse selection of materials and grits ensures optimal performance for both aggressive material removal and precision fine finishing. The set is highly versatile, making it an essential addition for metalworking, woodworking, and various other industrial material finishing applications.

Technical Specifications

Included Components	Flap Discs, Polishing Wheels, Mounted Brushes
Grit Specification	120

Application

Suitable Industries

- Metalworking
- Woodworking
- Surface Finishing
