

Power Tool Battery Charger

This compact battery charger is designed for power tools, providing efficient and safe charging for compatible batteries. It features LED indicators to display charging status, durable housing for protection, and optimized charging circuitry for extended battery life.

Overview

Efficient Power Tool Charging

This compact battery charger is engineered for reliable and safe power tool battery maintenance. Designed with optimized charging circuitry, it helps extend battery life while providing clear status updates via LED indicators. Its durable housing ensures long-term protection in professional work environments.

Electrical Specifications

Charging Current

1.5 A

Charging Current

Input Voltage	100-240V AC
Output Voltage	12 V DC

Features

Key Features

- LED charging status indicators
- Durable protective housing
- Optimized charging circuitry
- Extended battery life support

Origin	Made in China
