Product Overview

High-Performance Power Tool Battery

This rechargeable battery pack is engineered specifically for demanding power tool applications, utilizing a robust 18V NiMH configuration. With a capacity of 2000mAh, it provides reliable and consistent energy for cordless drills, saws, and other heavy-duty equipment. Designed for durability, the pack features a protected housing and is built to withstand a wide range of operating temperatures, making it a versatile choice for professional environments.

Electrical Specifications

Nominal Voltage	18 V
Nominal Capacity	2000 mAh
Charging Voltage	22.5 V
Discharge Termination Voltage	15 V
Internal Resistance	320 m Ω

Charging & Performance

Performance Metrics

0.1 C

Standard Charge Rate

0.5 C

Fast Charge Rate

10 C

Max Discharge Rate

Charging Modes

Mode	Duration	Notes
Standard	16 hours	0.1C rate
Fast	2.4 hours	0.5C rate

Operating Environment

Temperature Ranges

Operation	Range
Charging	0 to 45 °C
Discharge	-10 to 60 °C

Physical Properties

Weight	635 g
External Materials	Paper, PVC
