

# Power Tool Replacement Lithium Battery

This replacement lithium battery is designed for power tools. It features a robust construction with a secure locking mechanism for stable attachment to compatible devices, ensuring durability and reliable power delivery.

## Overview

### High-Performance Replacement Power

This 18V replacement lithium battery is engineered for demanding professional power tools. Featuring an imported high-quality lithium core, it provides consistent and strong power delivery for cordless equipment. Designed for durability and stability, it ensures reliable performance for everyday tasks like drilling and sawing.

## Technical Specifications

Rated Voltage	18 V
Battery Chemistry	Lithium-ion

## Features

### Key Advantages

- Imported high-quality lithium core
- High power output
- Secure locking mechanism
- Robust housing for durability

Compatible Tool Types	Cordless Drills, Power Saws
