

Powered Concrete Screed with Honda Engine

This powered concrete screed is designed for efficient surface finishing. It features a Honda 4-stroke engine, adjustable handlebars, and a long, rigid screed blade for leveling and smoothing concrete surfaces.

Product Overview

Professional Surface Finishing

This powered concrete screed is engineered to efficiently expel air, scrape concrete floors, and significantly increase concrete density. Weighing only 21kg, the unit is designed for ease of operation and simple transport across various job sites. It offers versatility for professional concrete slab finishing by supporting a wide variety of blade lengths to suit specific project requirements.

Technical Specifications

Primary Functions

- Expel air from concrete
- Scrape concrete floors
- Increase concrete density
- Surface leveling and smoothing

Weight	21 kg
Engine Type	4-stroke

Key Features

Key Advantages	Lightweight, Easy to operate, Highly portable, Adjustable
