

# Powered Subwoofer for Home Audio

This active subwoofer delivers super power bass for an enhanced audio experience. It provides speaker aggravation at low frequencies for a more comprehensive sound.

## Product Overview

### High-Performance Active Subwoofer

This 12-inch active subwoofer is engineered to deliver deep, impactful bass for both home theater and high-fidelity music systems. Featuring a robust reinforced cone and high-excursion surround, the unit ensures accurate, distortion-free low-frequency reproduction. With over 10 years of professional acoustic manufacturing experience, this subwoofer offers a reliable balance of sonic performance and structural durability.
