

Pozi Drive Double Countersunk Chipboard Screw

This chipboard screw features a pozi drive and double countersunk (CSK) head. Designed for secure fastening in chipboard and similar materials, the screw provides excellent holding power and a flush finish.

Product Overview

High-Performance Fastening

The Pozi Drive Double Countersunk Chipboard Screw is engineered for reliable and secure fastening in chipboard and various timber materials. Its double countersunk head design allows for a clean, flush finish, while the pozi drive head configuration ensures optimal torque transmission and significantly reduces the risk of cam-out. This screw is an essential component for professional woodworking and construction projects requiring superior holding power.

Technical Specifications

Drive Style	Pozi Drive
Head Type	Double Countersunk
Suitable Applications	Chipboard, Woodworking, Construction, Timber Joinery

Key Features

Performance Advantages

- Optimized torque transmission
- Reduced cam-out risk
- Excellent holding power
- Flush surface finish
