Product Overview

Versatile PP Monofilament Twisted Rope

This 3-strand twisted rope is crafted from high-quality polypropylene monofilament, engineered for exceptional durability in demanding environments. It features inherent resistance to corrosion, acid, and aging, while maintaining a lightweight structure that allows it to float on water. Known for its strength and flexibility, this rope is a reliable choice for marine, industrial, and general-purpose applications requiring superior performance.

Key Features

Performance Features

0 None

Water Absorption

Properties

Corrosion Resistant, Aging Resistant, Acid Resistant, Buoyant

Technical Specifications

Construction

3-Strand Twisted

Material

Polypropylene (PP) Monofilament

Logistics

Packaging Options

- Hank
- Bundle
- Reel
- Coils
