Product Overview

Premium Polypropylene Twine

This 3-strand twisted monofilament twine is engineered for versatility and long-lasting performance in demanding environments. It offers exceptional resistance to moisture, corrosion, and aging, ensuring high tensile strength for various industrial and general-purpose applications. The twine is designed for professional utility, balancing durability with economic value.

Technical Specifications

Construction	3-strand twisted monofilament
Material	Polypropylene (PP)
Performance Features	Corrosion Resistant, Aging Resistant, Non-water absorbing, High strength

Logistics & Packaging

Available Packaging

- Bundle
- Tube
