

PP PE Single Wall Corrugated Pipe Production Line

This PP PE single wall corrugated pipe production line is designed for continuous extrusion. It features precise control systems and robust construction to ensure consistent pipe quality.

Product Overview

Industrial Corrugated Pipe Production

This production line is engineered for the high-speed continuous extrusion of PP and PE single wall corrugated pipes. Featuring a robust, integrated design, the system ensures consistent pipe quality through precision control of the forming and extrusion processes. It is a versatile solution ideal for manufacturing drainage pipes, electrical conduits, and protective sleeving for various industrial sectors.

Technical Specifications

Included Components

- Extruder
- Forming machine
- Cooling system
- Winding unit

Model Number	CSMAZSTN-150B
Compatible Materials	PP, PE

Applications

Primary Applications

Drainage Systems • Electrical Conduit • Protective Sleeving
