

PP-R Pipe Welding Kit

This kit is designed for efficient and reliable thermoplastic pipe connections. It includes a temperature-controlled welding machine with various sized welding sockets for different pipe diameters.

Product Overview

Professional Thermoplastic Welding Solution

This comprehensive PP-R pipe welding kit is engineered for reliable and efficient thermoplastic pipe joining. Designed for versatility, it features a wide temperature range and includes multiple welding sockets to accommodate standard pipe diameters. The robust aluminum die-casting base and included high-quality hand tools provide a complete professional setup for plumbing and heating installations.

Technical Specifications

Operating Temperature

300 °C

Max Temperature

Input Power	1500 W
Voltage	230 V
Frequency	50 Hz

Capabilities

Included Welding Sockets

- 20
- 25
- 32
- 40
- 50
- 63

Accessories Included	Measuring Tape 3m, PVC Pipe Cutter 3-42mm, Screwdriver PH1x100mm, Steel Storage Box
----------------------	---

Construction & Compliance

Certifications

CE Approved

Construction & Construction

Base Material	Aluminum die casting
Cable Length	1.8 m
