

PPR Ball Valve

This PPR ball valve provides reliable shut-off control for fluid handling applications. It is constructed from PPR material, offering resistance to chemicals and high temperatures.

Product Overview

Professional Grade PPR Ball Valve

This PPR ball valve is engineered for reliable shut-off control in professional fluid handling applications, including plumbing, irrigation, and industrial systems. Constructed from high-quality PPR material, it offers superior resistance to chemicals and high temperatures while maintaining long-term durability. Its compact, full-bore design ensures minimal pressure drop and easy integration into space-constrained environments.

Technical Specifications

Handle Color

Red

Material

PPR (Polypropylene Random Copolymer)

Design Features

Full-bore, Compact, High-temperature resistance, Chemical resistant
