Product Overview

Reliable Wiring Solutions

This comprehensive assortment of pre-insulated electrical terminals is engineered for high-performance and safety in diverse electrical wiring applications. Each piece is designed to facilitate secure, durable connections while protecting against short circuits with specialized insulation sleeves. With an intuitive color-coded system based on wire gauge, this kit ensures efficient identification and professional-grade installation for any electrical project.

Technical Specifications

Supported Wire Gauges

- 22-16 AWG
- Other standard sizing

Key Features

Pre-insulated • Color-coded • Short-circuit protection

Model References

Part Reference

JM50-10

KR22-16

Included Terminal Types

Ring Terminals, Spade Terminals, Butt Connectors, Wire Connectors
