

# Pre-Printed Heat Shrink Tubing for Cable Marking

Heat shrink tubing is designed for marking and identifying cables. The pre-printed labels feature high-quality, consistent text for durable and clear identification in cable management applications.

## Overview

### Professional Cable Identification Solution

This pre-printed heat shrink tubing is engineered for durable cable marking and identification across various electrical and networking applications. The tubing provides high-quality, consistent printing that remains legible while offering essential insulation and mechanical protection for wiring. Supplied in a convenient roll format, it ensures efficient dispensing and application for high-volume cable management projects.

## Technical Features

### Primary Function

Cable Identification • Marking • Insulation • Protection

### Supply Format

Roll format for efficient dispensing

### Print Quality

High-quality, consistent text for clear readability

## Product Identification

### Model Series

AMS.2.5K-20-4H-W

### Applications

Cable Management, Industrial Labeling, Wire Harnessing
