

# Pre-Taped Masking Film with Cloth Tape

This pre-taped masking film combines durable cloth tape with a high-density polyethylene film for protecting surfaces. The cloth tape provides strong adhesion and clean removal, while the plastic film prevents paint bleed-through.

## Product Overview

### Professional Surface Protection

This pre-taped masking film combines high-density polyethylene (HDPE) film with durable cloth tape to create an efficient protection solution. Designed for professional painting, renovations, and handicraft projects, it allows for quick application and reliable surface coverage. The integrated cloth tape ensures strong adhesion while allowing for clean removal, effectively preventing paint bleed-through on protected areas.

## Technical Details

Backing Material	HDPE (High-Density Polyethylene)
Adhesive Tape Type	Cloth Tape

## Applications

Primary Applications	Wall Painting, Surface Protection, Renovation Projects, Handicraft Jobs
----------------------	---

## Performance

### Performance Features

- Strong adhesion
- Clean removal
- Prevents paint bleed-through
- Quick and easy application
