

# Precision Aluminum Mounting Plate

This precision aluminum mounting plate is designed for accurate and stable component mounting. Constructed from high-grade aluminum, it offers excellent rigidity and thermal stability for use in optical systems, robotics, and precision machinery.

## Product Overview

### Precision Aluminum Mounting Plate

This precision aluminum mounting plate is engineered for applications requiring high accuracy and stable component mounting. Constructed from high-grade aluminum, the plate offers excellent rigidity and thermal stability, making it an ideal choice for demanding environments. Its circular design, featuring a central bore and evenly spaced mounting holes, ensures versatile and reliable integration into optical systems, robotics, and precision machinery.

## Technical Specifications

Material	High-grade Aluminum
Surface Finish	Smooth Matte
Design Features	Circular Design, Central Bore, Evenly Spaced Mounting Holes

## Applications

### Primary Applications

- Optical Systems
- Robotics
- Precision Machinery
