

Precision CNC Lathe for Metalworking

This precision CNC lathe is designed for metalworking and machining operations. Its features include a robust frame, high-speed spindle, programmable control system, and enclosed workspace.

Overview

Precision CNC Lathe

The CK6130A is a professional-grade CNC lathe engineered specifically for high-precision metalworking and machining operations. Built with a robust frame and a high-speed spindle, it ensures stability and accuracy during demanding turning, facing, threading, and drilling tasks. This machine features an enclosed workspace for enhanced operator safety and an intuitive digital display for precise monitoring and control.

Technical Specifications

Model Number	CK6130A
Machining Capabilities	Turning, Facing, Threading, Drilling

Key Features

Key Machine Highlights

- Robust frame construction
- High-speed spindle
- Programmable control system
- Enclosed workspace for safety
- Digital monitoring display
