

Precision CNC Machined Aluminum Part

This precision-engineered part is manufactured using CNC machining techniques. Crafted from high-quality aluminum, it provides durability for demanding industrial applications.

Overview

Precision CNC Machined Components

These precision-engineered mechanical parts are manufactured using advanced CNC machining techniques. Crafted from high-quality aluminum, they offer a balance of durability and optimal performance for demanding industrial applications. Their design features a central hole, making them ideal for integration into complex machinery assemblies.

Manufacturing Capabilities

Production Equipment

- Laser cutting machines
- Flame cutting machines
- AMADA bending machines (8T, 80T, 150T)
- AMADA punching machines (35T, 45T)
- Matsushita welding robots
- Hydraulic press (200A)
- Milling machines
- Shear machines

Production Metrics

6500 sqm

Facility Area

4 Million USD

Annual Output Value

Processing Capabilities

Sheet Metal Processing, Laser Cutting, Flame Cutting, Plasma Cutting, Mechanical Processing, Riveting, Welding

Applications

Common Applications

Auto Parts • Forklift Accessories • Air Conditioning Accessories • Elevator Components
