

Precision CNC Machined Component

This precision component is manufactured using CNC machining processes. It is suitable for various industrial applications requiring tight tolerances and durable materials.

Overview

Precision CNC Machining Services

We provide comprehensive CNC machining solutions specializing in high-precision parts for demanding industrial sectors. Our capabilities integrate design, production, and rigorous quality service to deliver customized metal components with tight tolerances. From rapid prototyping to mass production, we support a wide range of applications including automotive, electronics, and mechanical engineering.

Manufacturing Capabilities

Material Capabilities

- Aluminum
- Brass
- Bronze
- Copper
- Hardened Metals
- Precious Metals
- Stainless Steel
- Steel Alloys

Surface Treatment

Electroplating • Zinc Plating • Anodizing • Passivation

Machining Processes

CNC Machining, Broaching, Drilling, Etching, Chemical Machining, Laser Machining, Milling, Turning, Wire EDM, Rapid Prototyping, Micro Machining

Technical Specifications

Target Industries

- Automotive
- Printers
- Laptops
- Mobile Phones
- LCD Monitors
- Digital Communications
- Home Appliances

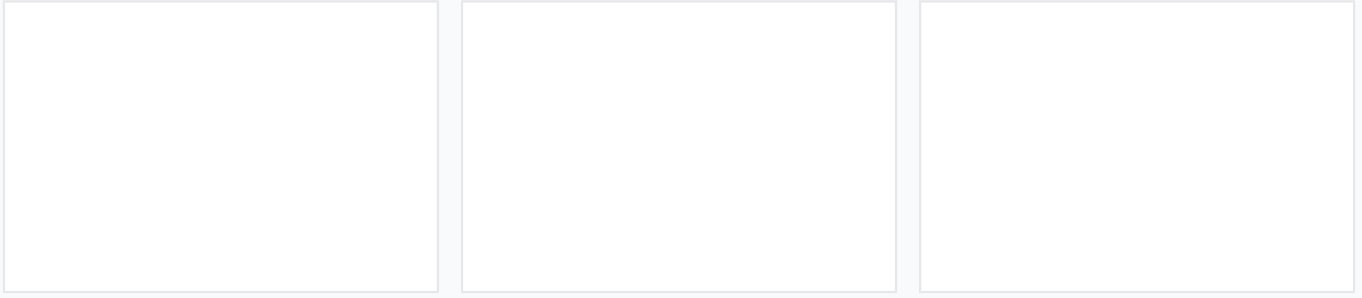

Primary Material

Stainless Steel

Service Type

OEM, ODM, Customized Design

Quality & Equipment

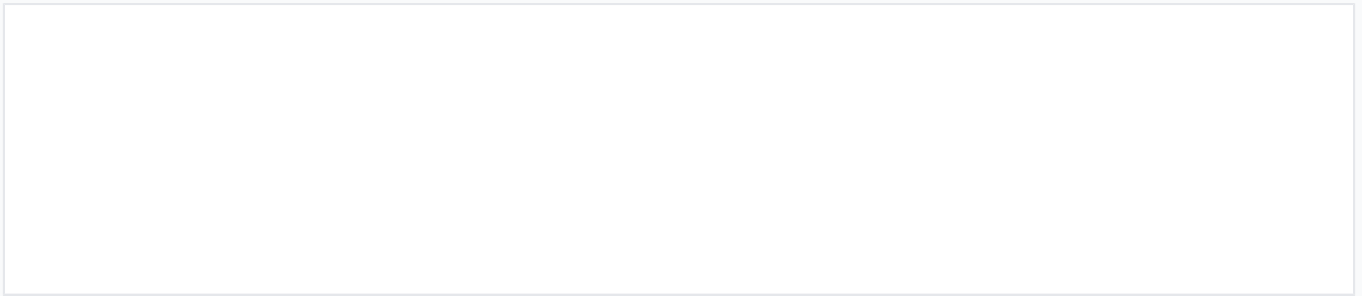

Production Equipment

- CNC Lathe Machines
- 200T Punching Machine
- Grinding Machines
- Electrical Discharge Machining (EDM)

Inspection & Quality Control

Vision Measuring Machine, Digital Micrometers, Precision Gauge Blocks, Optical Comparator

Business Terms

Production Workflow

- Drawing Review
- Product Quotation
- Mold Making
- Sample Creation
- Mass Production
- After-sales Service

Payment Terms

50% deposit, balance before shipment via T/T or L/C
