Overview

Precision Measurement Tool

This precision dial indicator is designed for accurate measurement in machining, manufacturing, and quality control applications. Featuring a durable aluminum case and brass internal movement, it offers reliable performance and high precision. The tool includes adjustable features such as a dial locking screw and an adjustable steel dial ring for enhanced usability and secure positioning.

Technical Specifications

Available Measuring Ranges

- 0-10mm
- 0-25mm
- 0-30mm
- 0-50mm

Resolution/Accuracy

0.01 mm

Construction

Key Features

- Inside tolerance hand
- Anti-dirty cap
- Dial locking screw
- Peach shaped mechanical body
- Adjustable steel dial ring

Materials

Aluminum Case, Brass Movement, Steel Body

Logistics

Packaging	Plastic Box, foam, and paper box
Production Lead Time	35-45 days

Customization

Customization Options	Yes
