

Precision Drawing Tool Set with Beam Compass

This precision drawing tool set includes a beam compass. It features adjustable arms and interchangeable heads for various drawing tasks.

Overview

Precision Drafting Excellence

This comprehensive precision drawing tool set is engineered for professionals requiring high accuracy in technical drawing and drafting applications. Featuring a versatile beam compass system with extension arms and interchangeable heads, the set allows for the creation of precise circles and arcs of varying sizes. Designed for efficiency and adaptability, the components can be easily exchanged to suit specific project requirements.

Technical Features

Included Components

- Beam compass
- Extension arms
- Interchangeable drawing heads
- Divider heads

Key Capabilities

Adjustable Radius • Interchangeable Parts • Precision Accuracy

Applications

Technical Drawing, Drafting, Precision Engineering, Design
