

# Precision Electric Die Grinder

This precision electric mill is designed for detailed work, featuring a variable speed control for optimal performance across different materials. Its compact and ergonomic design ensures comfortable handling and precise control during operation.

## Overview

### Precision Performance

This precision electric die grinder is engineered for versatile surface grinding and polishing applications. With a robust 200W motor and variable speed control ranging from 8500 to 22000 r/min, it offers the adaptability required for professional metal, wood, and stone finishing. The ergonomic design ensures consistent handling for detailed, high-precision tasks.

## Technical Specifications

Power Input	200 W
No Load Speed Range	8500-22000 r/min
Chuck Capacity	2.5-6.35 mm
Power Supply Cord Length	2.8 m

## Applications

### Primary Uses

- Surface Grinding
- Polishing

Suitable Materials	Metal, Wood, Stone
--------------------	--------------------
