

Precision Engraving and Etching Machine

This engraving and etching machine is designed for precision material removal. It features a robust build with a powerful motor for efficient operation.

Overview

Precision Engraving and Etching Machine

This engraving and etching machine is engineered for high-precision material removal tasks. Built with a robust construction and a powerful motor, it ensures efficient and reliable operation for professional applications. The unit features adjustable depth settings and a stable base, allowing for accurate and repeatable results across a wide range of engraving and etching projects.

Technical Specifications

Rated Power

1600 W

Rated Power

2.25 HP

Horsepower

Model Number

7120001

Features

Key Features

- Adjustable depth settings
- Stable base for accuracy
- Robust build quality
- High-performance motor

Application

Suitable Applications

Engraving, Etching, Material Removal
