

# Precision Jewelry Pliers for Fine Work

Precision jewelry pliers are designed for intricate work. The pliers feature a slender profile for accessing tight spaces, high-carbon steel construction for durability, and ergonomic handles for comfortable grip and reduced hand fatigue.

## Product Overview

### Precision-Engineered Jewelry Pliers

These precision-engineered jewelry pliers are specifically designed for intricate work in jewelry making and repair. Featuring a slender profile, they allow for easy access to tight spaces, while the high-carbon steel construction ensures long-lasting durability. The ergonomic handles are crafted to provide a comfortable grip, effectively reducing hand fatigue during extended periods of use.

## Technical Specifications

Material	High-carbon steel
Applications	Wire cutting, Wire shaping, Component manipulation, Jewelry repair

## Features

### Key Features

- Slender profile for tight spaces
- High-carbon steel durability
- Ergonomic handle design
- Reduced hand fatigue
