

Precision Laser Engraving and Etching Machine

This engraving and etching machine is designed for precision material processing. It is suitable for a variety of materials, including metals, plastics, and composites.

Overview

Precision Laser Processing

This high-precision laser engraving and etching machine is engineered for versatile material processing across metals, plastics, and composites. Featuring a high-resolution laser system, it enables the creation of intricate designs and fine details with ease. The unit is equipped with adjustable power settings and variable speed controls, making it suitable for a wide range of industrial, educational, and hobbyist applications.

Technical Capabilities

Performance Features

- High-resolution laser system
- Adjustable power settings
- Variable speed control

Compatible Materials

Metals, Plastics, Composites

Safety and Operation

Safety Systems

Enclosed Work Area • Emergency Stop Button

User Interface

User-friendly interface for easy programming and operation
