

Precision Laser Level

This high-quality laser level is designed for precision in leveling and alignment. Its compact and durable construction ensures reliability in demanding environments.

Product Overview

Precision Laser Level EPT-SL03

The EPT-SL03 is a high-precision laser level engineered for demanding construction and alignment tasks. Its compact and durable design ensures reliable performance in harsh environments, while the bright laser beam provides excellent visibility for accurate leveling. This tool is an essential asset for professionals requiring consistent precision in installation and alignment projects.

Technical Specifications
