

Precision Leveling Tool

This precision leveling tool is designed for accurate horizontal and vertical alignment in various applications. Its robust construction ensures durability in demanding environments.

Product Overview

Precision Leveling Tool

The EPT-RL04 is a precision leveling tool designed for various applications requiring accurate horizontal or vertical alignment. Its robust construction ensures durability in demanding environments. The tool features a clear and easy-to-read level indicator for quick and precise adjustments, making it suitable for construction, surveying, and other tasks where accuracy is critical.

Technical Specifications

Key Features

- Robust construction for durability
- Clear, easy-to-read level indicator
- Designed for quick and precise adjustments

Model Number	EPT-RL04
Primary Applications	Construction, Surveying, Alignment, Horizontal Leveling, Vertical Leveling
