

Precision Machined Iron Casting with Oil Level Indicator

This is a two-part iron casting with a circular cover and housing. It features precision-machined surfaces, an oil level indicator, and mounting points, suggesting use in mechanical systems.

Product Overview

Precision Engineered Iron Casting

This precision-machined iron casting is designed for demanding mechanical applications, featuring a robust two-part construction. The assembly includes a circular cover with a dedicated oil level indicator and a housing unit equipped with a central bore and integrated mounting points. Its smooth surface finish and precise design suggest suitability for critical systems such as pumps or engines.

Technical Specifications

Design Features

- Integrated oil level indicator
- Central bore housing
- Precision-machined surface finish
- Two-part assembly
- Integrated mounting points

Part Identifiers

102658, FS11

Material

Iron
