

Precision Machined Metal Components

These precision machined components are manufactured for assembly in mechanical systems. The parts are made from durable metals and are suitable for industrial applications requiring high accuracy.

Product Overview

High-precision components designed for demanding industrial and mechanical applications.

Precision Machined Components

These precision machined metal components are engineered for high accuracy and durability in mechanical assembly applications. Manufactured with tight tolerances, these parts serve various industrial needs for reliable and long-lasting performance. The product is versatile and suitable for diverse mechanical systems requiring expert machining.

Manufacturing Details

Place of Origin	Zhejiang, China
Machining Capability	Micro Machining

Logistics and Trade

Minimum Order Quantity	5000 Piece
Delivery Time	20 days
Shipping Port	Ningbo
Quarterly Supply Ability	200000 Piece
Accepted Payment Methods	L/C, T/T
Packaging Details	Wooden box or common export carton/pallet
