

Precision Machined Metal Enclosures

These precision-machined metal enclosures are manufactured from durable sheet metal. They feature multiple knockouts or pre-drilled holes and a protective coating.

Product Overview

Precision Sheet Metal Enclosures

These precision-machined metal enclosures are engineered for demanding industrial and commercial applications. Utilizing advanced laser cutting and CNC fabrication techniques, these components offer high dimensional accuracy and consistent quality. Designed for durability, they are suitable for electrical junction boxes and similar housing requirements in international markets.

Manufacturing Capabilities

Key Equipment

- 15000KW High-Power Laser Cutting Machine
- 4m / 6m Plate Shearing Machines
- Bending Machines
- CNC Machine Tools

Fabrication Processes

Laser Cutting, Sheet Metal Fabrication, Riveting, Welding, CNC Machining

Company Profile

Facility Area

6000 sqm

Total Area

Years of Operation

16 years

Logistics & Markets

Export Destinations

Europe • America • Japan • Korea
